The IDS recites two application serial numbers. Applicant is advised that an application is not prior art. Accordingly, these items on the POL-1449 have been lined through by the examiner.

Claims 8 and 14 are objected to for the improper use of parenthesis. Parenthesis in claims may only be used for drawing reference characters. Correction of the above and all similar matters is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Loverinch.

In Loverinch the arm driving portion includes a power transmission mechanism
11. The over-center crank rod constitutes a clamping force applying portion.

Claims 2-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and eliminating the objectionable parenthesis as set forth supra.
